

OREGON DEPARTMENT OF ENVIRONMENTAL QUALITY
OREGON TITLE V OPERATING PERMIT

Western Region
750 Front St. NE, Suite 120
Salem, OR 97301-1039
Telephone (503) 378-8240

Issued in accordance with the provisions of ORS 468A.040
and based on the land use compatibility findings included in the permit record.

ISSUED TO:

Roseburg Forest Products Co.
EWP Facility
PO Box 1088
Roseburg, OR 97470

INFORMATION RELIED UPON:

Application Number: 021995
Received: 10/30/06

PLANT SITE LOCATION:

EWP Facility
4500 Riddle Bypass Road
Riddle, OR 97469

LAND USE COMPATIBILITY STATEMENT:

Issued by: Douglas County
Dated: 09/07/99

ISSUED BY THE DEPARTMENT OF ENVIRONMENTAL QUALITY

Cheryll Hutchens, Western Region Air Quality Manager Date

Nature of Business:

Plywood Manufacturing and/or Veneer Drying
Millwork (including kitchen cabinets and structural wood members)
Fuel Burning Equipment, 30 million or more Btu/hour heat input

SIC:

2436
2439
4961

RESPONSIBLE  ICIAL

Name: Roseburg Forest Products Co.
Title: President
And/or
Title: Vice-President, Manufacturing
And/or
Title: EWP Manager

FACILITY CONTACT PERSON

Name: Ellen Porter
Title: Manager Environmental Affairs
Phone: (541) 679-2130

LIST OF ABBREVIATIONS THAT MAY BE USED IN THIS PERMIT

ACDP	Air Contaminant Discharge Permit	MMSf	One million square feet
Act	Federal Clean Air Act	NA	Not applicable
ASTM	American Society of Testing and Materials	NESHAP	National Emissions Standards for Hazardous Air Pollutants
BDT	Bone dry ton	NO _x	Nitrogen oxides
Btu	British thermal unit	NSPS	New Source Performance Standards
CFR	Code of Federal Regulations	O ₂	Oxygen
CO	Carbon Monoxide	OAR	Oregon Administrative Rules
CPMS	Continuous parameter monitoring system	ODEQ	Oregon Department of Environmental Quality
DEQ	Department of Environmental Quality	ORS	Oregon Revised Statutes
dscf	Dry standard cubic feet	O&M	Operation and maintenance
EF	Emission factor	Pb	Lead
EPA	US Environmental Protection Agency	PCD	Pollution Control Device
EU	Emissions Unit	PCWP	Plywood and Composite Wood Products
FCAA	Federal Clean Air Act	PM	Particulate matter
FSA	Fuel sampling and analysis	PM ₁₀	Particulate matter less than 10 microns in size
gr/dscf	Grain per dry standard cubic feet (1 pound = 7000 grains)	ppm	Parts per million
HAP	Hazardous Air Pollutant as defined by OAR 340-244-0040	PSEL	Plant Site Emission Limit
HCFC	Halogenated Chloro-Fluoro-Carbons	psia	pounds per square inch, actual
ID	Identification number or label	SERP	Source emissions reduction plan
I&M	Inspection and maintenance	SO ₂	Sulfur dioxide
MACT	Maximum Achievable Control Technology	SSM	Startup, Shutdown, and Malfunction
Mft ³	1000 cubic feet	ST	Source test
Mgal	1000 gallons	VE	Visible emissions
MIbs	1000 pounds	VMT	Vehicle miles traveled
Msf	1000 square feet	VOC	Volatile organic compounds

PERMITTED ACTIVITIES

1. Until such time as this permit expires or is modified or revoked, the permittee is allowed to discharge air contaminants from those processes and activities directly related to or associated with air contaminant source(s) in accordance with the requirements, limitations, and conditions of this permit. [OAR 340-218-0010 and 340-218-0120(2)]

2. All conditions in this permit are federally enforceable except Conditions 5, 6, 7, G4 and G8 (OAR 340-248-0005 through 0180) are only enforceable by the state. [OAR 340-218-0060]

EMISSIONS UNIT (EU) AND POLLUTION CONTROL DEVICE (PCD) IDENTIFICATION

3. The emissions units regulated by this permit are the following [OAR 340-218-0040(3)]:

Emissions Unit	EU ID	Pollution Control Device/Practice*	PCD ID
Thermal Oil Heater 1	Heater 1	None	NA
Thermal Oil Heater 2	Heater 2	None	NA
LVL Press 1	Press 1	None	NA
LVL Press 2	Press 2	None	NA
Veneer Dryer 1	Dryer 1	RCO	
Veneer Dryer 2	Dryer 2	RCO	
Curing Chamber 1	Burner 1	None	NA
Curing Chamber 2	Burner 2	None	NA
Paved Roads and Parking Lots	Roads	Sweeper, wash down	---
Facility VOC	Facility VOC	None	NA
Entire facility including emissions units Dryers 1 & 2, Heaters 1 & 2, Presses 1 & 2, Burners 1 & 2, Facility VOC, Roads, and AI for purposes of the rolling 12 month PSEL to be calculated on a monthly basis.	Facility-1	see individual emissions units	see individual emissions units
Aggregate Insignificant (VOC) Resin Storage Tanks 1-3 and Burners 1-2 (PM/PM ₁₀) Baghouses 1-3 and Burners 1-2	AI	none	---

EMISSION LIMITS AND STANDARDS, TESTING, MONITORING, AND RECORDKEEPING REQUIREMENTS

The following tables and conditions contain the applicable requirements along with the testing, monitoring, and recordkeeping requirements for the emissions units to which those requirements apply.

FACILITY WIDE**Table 1 Summary of Facility Wide Emission Limits and Standards**

Applicable Requirement	Requirement Condition Number	Pollutant/Parameter	Limit/Standard	Monitoring Requirement	Monitoring Condition Number
340-208-0210(2)	4	Fugitive PM emissions	Minimize	Complaint investigation	7
340-208-0300	5	Air contaminants	No nuisance	Complaint investigation	7
340-208-0450	6	PM >250µm	No fallout	Complaint investigation	7
40 CFR Part 63, Subpart DDDD	8	Organic HAPs	See Subpart DDDD	See Subpart DDDD	8
40 CFR Part 63, Subpart DDDDD	9	Metal HAPs, HCl, Mercury	See Subpart DDDDD	See Subpart DDDDD	9

Fugitive PM Emissions

4. The permittee must not allow or permit any materials to be handled, transported, or stored; or a building, its appurtenances, or a road to be used, constructed, altered, repaired or demolished; or any equipment to be operated, without taking reasonable precautions to prevent particulate matter from becoming airborne. Such reasonable precautions shall include, but not be limited to the following: [OAR 340-208-0210(2)]
 - 4.a. remove all spillage caused by plug ups and/or leakage as soon as possible, but in no case later than 24 hours after discovery;
 - 4.b. use, where possible, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads or the clearing of land;
 - 4.c. application of asphalt, oil, water, or other suitable chemicals on unpaved roads, materials stockpiles, and other surfaces which can create airborne dusts;
 - 4.d. full or partial enclosure of materials stockpiles in cases where application of oil, water, or chemicals are not sufficient to prevent particulate matter from becoming airborne;
 - 4.e. installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty materials;
 - 4.f. adequate containment during sandblasting or other similar operations; and
 - 4.g. covering, at all times when in motion, open bodied trucks transporting materials likely to become airborne;
 - 4.h. prompt removal from paved streets of earth or other material that does or may become airborne.

Nuisance Conditions

5. The permittee must not cause or allow air contaminants from any source to cause a nuisance. Nuisance conditions will be verified by Department personnel. [OAR 340-208-0300] This condition is enforceable only by the State.
6. The permittee must not cause or permit the emission of any particulate matter larger than 250 microns in size at sufficient duration or quantity, as to create an observable deposition upon the real property of another person. The Department will verify that the deposition exists and will notify the permittee that the deposition must be controlled. [OAR 340-208-0450] This condition is enforceable only by the State.

Fugitive Dust and Nuisance Conditions Monitoring

7. The permittee must maintain a log of each nuisance, particulate matter fallout, or fugitive dust complaint received by the permittee during the operation of the facility. Documentation must include date of contact, time of observed nuisance condition, description of nuisance condition, location of receptor, status of plant operation during the observed period, and time of response to complainant. A plant representative must immediately investigate the condition following the receipt of the nuisance complaint and a plant representative must provide a response to the complainant within 24 hours, if possible. This condition is only enforceable by the state. [OAR 340-218-0050(3)(a)]

Plywood and Composite Wood Products (PCWP) NESHAP

8. Unless the EPA determines that the affected facilities at this source meet the requirements of the low-risk subcategory, the permittee must comply with the requirements of 40 CFR Part 63, Subpart DDDD by no later than October 1, 2008.
- 8.a. Should the affected facilities qualify for the low-risk subcategory, the permittee must submit an application for a significant permit modification (moderate level) to the Department within 90 days of the EPA determination date. The permit modification application must contain the operational and / or production requirements that will ensure the affected facilities remain in the low-risk subcategory. [Paragraph 11(b) of Appendix B to Subpart DDDD of Part 63]

Boiler and Process Heater NESHAP

9. The permittee must comply with the requirements of 40 CFR Part 63, Subpart DDDDD by no later than September 13, 2007.
- 9.a. Should the permittee choose to comply with the Health-Based Compliance Alternative, the permittee must submit an eligibility demonstration and an application for a significant permit modification (moderate level) to the Department consistent with the rule. The permit modification application must contain the operational and/or production requirements that defined the affected source(s) as eligible for the Health-Based Compliance Alternative. [Paragraph 8(d) of Appendix A to Subpart DDDDD of Part 63]

HEATERS 1 & 2 (EUs Heaters 1 & 2)**Table 2 Summary of Requirements for Emissions Units Heaters 1 & 2:**

Applicable Requirement	Requirement Condition Number	Pollutant/Parameter	Limit/Standard	Monitoring Requirement	Monitoring Condition Number
340-208-0110(2)	10	Visible emissions	20% opacity (3 min. aggregate in 60 minutes)	Quarterly VE tests	12
340-228-0210(1)(b)	11	PM	0.1 gr/dscf @12%CO ₂ (avg. of 3 test runs)	Quarterly VE tests	12
40 CFR 60.48c(g) & (i)	13	Fuel usage	Record natural gas usage	Monthly Recordkeeping	13

Visible Emissions Standard

- 10. The permittee must not cause or allow the emissions of any air contaminant into the atmosphere for a period or periods aggregating more than three minutes in any one hour which is equal to or greater than 20% opacity, excluding uncombined water, from emissions units Heaters 1 & 2. [OAR 340-208-0110(2)]

PM Emissions Standard

- 11. The permittee must not cause or allow the emissions of particulate matter in excess of 0.1 gr/dscf corrected to 12% CO₂ from emissions units Heaters 1 & 2. [OAR 340-228-0210(1)(b)]

Visible Emissions and PM Emissions Monitoring

- 12. The permittee must monitor visible emissions from Heaters 1 & 2 by conducting a Modified EPA Method 9 test.
 - 12.a. The modified EPA Method 9 test method may be waived provided the permittee conducts a six (6) minute visible emissions survey on the devices at the compliance demonstration points using EPA Method 22 and visible emissions, excluding water vapor, are not detected for more than 5% (18 seconds) of the survey time.
 - 12.b. The visible emissions tests must be conducted at least once per quarter.
 - 12.c. If any test result exceeds the applicable standard in Condition 10, the permittee must initiate corrective action within 1-hour to bring the heater into compliance with the applicable standards. Once the corrective actions are completed, a Modified EPA Method 9 test must be conducted as soon as is practicable to demonstrate that the source is in compliance with the applicable standard. If the permittee observes no further exceedances during the Modified EPA Method 9 test, the monitoring frequency can go back to the previous monitoring frequency for the monitoring point that had an exceedance.
 - 12.d. If the observer is unable to conduct the tests and/or surveys due to darkness or visual interference caused by other visible emission sources or due to adverse weather conditions such as fog, heavy rain, or snow, the observer shall note such conditions on the observation form and make at least three attempts to conduct the tests and/or surveys at approximately 2-hour intervals throughout the day during daylight hours. The permittee must attempt to conduct the tests daily until a valid observation period is completed.
 - 12.e. Recordkeeping: The permittee must maintain records of all visible emissions tests and surveys, including: date, time, observer, observations, results, and any corrective actions taken. If a test is waived, so state on the record.

Operational Monitoring

- 13. The permittee shall monitor and record the amount of natural gas combusted in Heaters 1 & 2 each month.
 - 13.a. Recordkeeping: The permittee must maintain records of the natural gas usage as required by 40 CFR 60.48c(g) and (i) for each month of operation.

VENEER DRYERS 1 & 2 (EUs Dryers 1 & 2)

Table 3 Summary of Requirements for Emissions Units Dryers 1 & 2

Applicable Requirement	Requirement Condition Number	Pollutant/Parameter	Limit/Standard	Monitoring Requirement	Monitoring Condition Number
340-234-0510(1)	14	Visible emissions	10% average, opacity 20% maximum opacity as 6 min. avg.	Quarterly VE tests	15
340-226-0210(1)(b)	16	PM	0.1 gr/dscf (avg. of 3 test runs)	I & M/CPMS	18/19
340-226-0310	17	PM	Table 1 OAR 340 Division 226	I & M/CPMS	18/19
340-234-0510(1)(e) & (g)	20	Air contaminant emissions	Minimize with highest and best operation	Monthly I & M	21
340-234-0510(1)(f)	22	Air contaminant emissions	Concealing emissions prohibited	Yearly I & M	23

Visible Emissions Standard

14. **Applicable Requirement:** The permittee shall not cause or allow the operation of emissions units Dryers 1 & 2 such that visible air contaminants emitted from the dryer stack or emission point exceed an average operating opacity of ten percent or a maximum opacity of 20 percent. [OAR 340-234-0510(1)]
- 14.a. "Average operating opacity" means the opacity of emissions determined using EPA Method 9 on any three days within a 12-month period which are separated from each other by at least 30 days. A violation of the average operating opacity limitation is judged to have occurred if the opacity of emissions on each of the three days is greater than the specified average operating opacity limitation. [OAR 340-234-0010]
- 14.b. "Maximum opacity" means the opacity as determined by an EPA Method 9 visible emissions test. [OAR 340-234-0010]

Visible Emissions Monitoring

15. The permittee must monitor visible emissions from emissions units Dryers 1 & 2 by conducting EPA Method 9 tests at the outlet of the RCO and on the roof vent above each dryer.
- 15.a. The EPA Method 9 test method may be waived provided the permittee conducts a six (6) minute visible emissions survey on the device at the compliance demonstration point using EPA Method 22 and visible emissions, excluding water vapor, are not detected for more than 5% (18 seconds) of the survey time.
- 15.b. The visible emissions tests on the RCO outlet and dryer roof vent must be conducted at least once per quarter.
- 15.c. If any test result exceeds the applicable standard in Condition 14, the permittee must initiate corrective action within 1-hour to bring the dryer into compliance with the applicable standards. Upon completion of the corrective actions, a EPA Method 9 test must be conducted as soon as is practicable to demonstrate that the source is in compliance with the applicable standard. If the permittee observes no further exceedances during the EPA Method 9 test, the monitoring frequency can go back to the previous monitoring frequency for the monitoring point that had an exceedance.
- 15.d. If the observer is unable to conduct the tests and/or surveys due to darkness or visual interference caused by other visible emission sources or due to adverse weather conditions such as fog, heavy

rain, or snow, the observer shall note such conditions on the observation form and make at least three attempts to conduct the tests and/or surveys at approximately 2-hour intervals throughout the day during daylight hours. The permittee must attempt to conduct the tests daily until a valid observation period is completed.

- 15.e. All visible emissions tests and surveys shall be conducted during operating conditions that have the potential to create visible emissions (e.g., during loading and/or unloading activities).
- 15.f. Recordkeeping: The permittee must maintain records of all visible emissions tests and surveys, including: date, time, observer, observations, results, and any corrective actions taken.

PM Emission Standards

- 16. The permittee must not cause or allow the emissions of particulate matter in excess of 0.1 gr/dscf from emissions units Dryers 1 & 2. [OAR 340-226-0210(1)(b)]
- 17. The permittee must not cause, suffer, allow, or permit the emissions of particulate matter in any one hour from emissions units Dryers 1 & 2 in excess of the amount shown in Table 1 of OAR 340 Division 226, for the process weight allocated to that process. [OAR 340-226-0310]

PM Emissions Monitoring

Inspection and Maintenance Monitoring

- 18. During each regularly scheduled maintenance outage of Dryers 1 & 2, the permittee must inspect the RCO for physical degradation that could affect the performance of the control device. The permittee must make all necessary repairs to the unit to ensure efficient operation.
 - 18.a. Recordkeeping: The permittee must maintain records of the inspections including date, systems and items inspected, findings, and repair activities undertaken.

Operational Monitoring

- 19. The permittee must continue to calibrate, maintain, and record the output of a continuous combustion chamber temperature monitoring system (CPMS) in accordance with the manufacturer's written instructions on the RCO. The recorder shall sample and record the temperature at least once per minute. The temperature monitoring and recording system shall provide a visual and audible alarm whenever operation is outside the manufacturer's recommended combustion chamber temperature range. Minimum data availability shall be in accordance with Condition 60. Monitor availability shall be determined in accordance with Condition 39.
 - 19.a. The permittee shall take any necessary corrective action anytime the RCO combustion chamber temperature is outside the recommended range.
 - 19.a.i. Recordkeeping: The permittee must maintain records of the RCO combustion chamber temperatures, any recommended range excursions, and corrective actions taken.

Highest and Best

- 20. Dryers 1 & 2 shall be maintained and operated at all times such that air contaminant generating processes and all contaminant control equipment shall be at full efficiency and effectiveness so that the emission of air contaminants are kept at the lowest practicable levels. Where effective measures are not taken to minimize fugitive emissions, the Department may require that the equipment or structures in which

processing, handling, and storage are done, be tightly closed, modified, or operated in such a way that air contaminants are minimized, controlled, or removed before discharge to the open air. [OAR 340-234-0510(1)(e) and (g)]

- 21. At least once per month the permittee shall conduct an external inspection of Dryers 1 & 2 for fugitive emissions and signs of physical degradation. Recordkeeping: Records shall be maintained of each inspection, findings, and corrective actions taken.

Concealing Emissions

- 22. The permittee shall not willfully cause or permit the installation or use of any means, such as dilution, which, without resulting in a reduction in the total amount of air contaminants emitted, conceals an emission which would otherwise violate OAR 340-234-0510. [OAR 340-234-0510(1)(f)]
- 23. At least once per calendar year, the permittee shall inspect the Dryers 1 & 2 to ensure that the dryers have not been altered in such a manner that could conceal the discharge of air contaminant emissions without actually reducing emissions. Recordkeeping: Records shall be maintained of the inspections, findings, and actions taken.

LVL PRESSES 1 & 2 (EUs Presses 1 & 2)

Table 4 Summary of Requirements for Emissions Units Presses 1 & 2

Applicable Requirement	Requirement Condition Number	Pollutant/Parameter	Limit/Standard	Monitoring Requirement	Monitoring Condition Number
340-208-0110(2)	24	Visible emissions	20% opacity (3 min. aggregate in 60 minutes)	Quarterly VE tests	26
340-226-0210(1)(b)	25	PM	0.1 gr/dscf (avg. of 3 test runs)	Quarterly VE tests	26

Visible Emissions Standard

- 24. The permittee must not cause or allow the emissions of any air contaminant into the atmosphere for a period or periods aggregating more than three minutes in any one hour which is equal to or greater than 20% opacity, excluding uncombined water, from emissions units Presses 1 & 2. [OAR 340-208-0110(2)]

PM Emission Standard

- 25. The permittee must not cause or allow the emissions of particulate matter in excess of 0.1 gr/dscf from emissions units Presses 1 & 2. [OAR 340-226-0210(1)(b)]

Visible Emissions and PM Emissions Monitoring

- 26. The permittee must monitor visible emissions from the Presses 1 & 2 by conducting a Modified EPA Method 9 test at the building vents of each press. Each Modified EPA Method 9 test must be a minimum of 6 minutes long unless any one reading is greater than 20% opacity, then the observation period must be 60 minutes or until a violation of the applicable standard in Condition 24 is documented, whichever period is shorter.

26.a. The Modified EPA Method 9 test method may be waived provided the permittee conducts a six

(6) minute visible emissions survey on the device at the compliance demonstration point using EPA Method 22 and visible emissions, excluding water vapor, are not detected for more than 5% (18 seconds) of the survey time.

- 26.b. The visible emissions tests on each press vent must be conducted at least once per quarter.
- 26.c. If any test result exceeds the applicable standard in Condition 24, the permittee must initiate corrective action within 1-hour to bring the press into compliance with the applicable standards. Upon completion of the corrective actions, a Modified EPA Method 9 test must be conducted as soon as is practicable to demonstrate that the source is in compliance with the applicable standard. If the permittee observes no further exceedances during the Modified EPA Method 9 test, the monitoring frequency can go back to the previous monitoring frequency for the monitoring point that had an exceedance.
- 26.d. If the observer is unable to conduct the tests and/or surveys due to darkness or visual interference caused by other visible emission sources or due to adverse weather conditions such as fog, heavy rain, or snow, the observer shall note such conditions on the observation form and make at least three attempts to conduct the tests and/or surveys at approximately 2-hour intervals throughout the day during daylight hours. The permittee must attempt to conduct the tests daily until a valid observation period is completed.
- 26.e. Recordkeeping: The permittee must maintain records of all visible emissions tests and surveys, including: date, time, observer, observations, results, and any corrective actions taken.

ROADS

Table 5 Summary of Requirements for Emissions Unit Roads

Applicable Requirement	Requirement Condition Number	Pollutant/Parameter	Limit/Standard	Monitoring Requirement	Monitoring Condition Number
340-208-0110(2)	27	Visible emissions	20% opacity, 3 minute aggregate in 60 minutes	Complaint investigation	28

Visible Emissions Standard

27. Applicable Requirement: The permittee shall not cause or allow the emissions of any air contaminant into the atmosphere from the emissions unit Roads for a period or periods aggregating more than three minutes in any one hour which is equal to or greater than 20% opacity, excluding uncombined water. [OAR 340-208-0110(2)]

Visible Emissions Monitoring

28. Monitoring Requirement: The permittee shall investigate fugitive emissions complaints in accordance with the requirements of Condition 7.

INSIGNIFICANT ACTIVITIES EMISSION LIMITS AND STANDARDS

29. The Department acknowledges that insignificant emissions units (IEUs) identified by rule as either categorically insignificant activities or aggregate insignificant emissions as defined in OAR 340-200-0020 exist at facilities required to obtain an Oregon Title V Operating Permit. IEUs must comply with all applicable requirements. In general, the requirements that could apply to IEUs are incorporated as follows:

- 29.a. OAR 340-208-0110 (20% opacity)

- 29.b. OAR 340-228-0210 (0.1 gr/dscf corrected to 12% CO₂ or 50% excess air for fuel burning equipment)
 - 29.c. OAR 340-226-0210 (0.1 gr/dscf for non fugitive, non-fuel burning equipment)
 - 29.d. OAR 340-226-0310 (process weight limit for non fugitive, non-fuel burning process equipment)
30. Testing, Monitoring, and Recordkeeping Requirements: Unless otherwise specified in this permit, the Department is not requiring any testing, monitoring, recordkeeping, or reporting for the applicable emissions limits and standards that apply to IEUs. However, if testing were performed for compliance purposes, the permittee would be required to use the test methods identified in the definitions of “opacity” and “particulate matter” in OAR 340-208-0010 and perform the testing in accordance with the Department’s Source Sampling Manual.

PLANT SITE EMISSION LIMITS

31. The plant site emissions must not exceed the following limits for any 12 consecutive calendar month period: [OAR 340-222-0040 through OAR 340-222-0043]

Pollutant	Plant Site Emission Limits
	(tons)
PM	24
PM ₁₀	14
CO	99
NO _x	39
VOC	39

- 31.a. For annual Title V fee purposes, the permittee need only pay based on the PSEL and in accordance with Oregon Administrative Rules, Division 220.

PSEL Monitoring

32. The permittee must conduct the following monitoring activities to demonstrate compliance with the emission limit requirements of Condition 31. [OAR 340-218-0050(3)]

- 32.a. The permittee must maintain records of the following process parameters:

Emissions Unit(s)/ Process	Process Parameter	Units	Measurement Technique	Frequency
Heaters 1 & 2	Natural gas usage	MM ft ³	Flow Meter	Monthly totals each
Burners 1 & 2	Natural gas usage	MM ft ³	Flow Meter	Monthly total
Dryers 1 & 2	Veneer dried by dryer and species (e.g., Douglas Fir, White Fir, Pine, redry)	MSF-3/8” finished basis	Production records	Monthly total
RCO	Natural gas usage	MM ft ³	Flow Meter	Monthly total
Presses 1 & 2	LVL production	M ft ³	Production records	Monthly totals each

Emissions Unit(s)/ Process	Process Parameter	Units	Measurement Technique	Frequency
Facility VOC	VOC chemical usage	Gallons, VOC content	Usage records, MSDS or CPDS	Monthly total

32.b. The permittee must calculate pollutant mass emissions for each 12 consecutive calendar month period by the end of the following month using the following equation:

$$E = (\sum(P_{eu} \times EF_{eu})/2000) + AI$$

where:

E = pollutant emissions (tons/year)

P_{eu} = process parameters identified in Condition 32.a

EF_{eu} = emission factor identified for each emissions unit and pollutant in Condition 32.e

AI = aggregate insignificant activities = 1 ton (for VOC and PM/PM₁₀ only)

32.c. Compliance with PSELs must be determined using the calculations contained in Condition 32.b using the monitored parameters recorded during the reporting period and the emission factors contained in Condition 32.e, unless the permittee elects to pay emission fees based on actual emissions using a verified emission factor determined in accordance with OAR 340-220-0170. If the permittee is paying on actual emissions based on a verified emission factor, the verified emission factor must be used for determining compliance with the PSEL in accordance with Condition 36.

32.d. As an alternative to performing the emission calculations in Condition 32.b, the permittee may keep records demonstrating that none of the following annual operational parameters are exceeded. The comparison for each 12 consecutive month period must be performed by the last day of the following month. An exceedance of an operational parameter is not necessarily a violation of the PSEL. Should an operational exceedance occur, the permittee must calculate the actual emissions for the period in accordance with Condition 32.b.

32.d.i. Total natural gas usage in Heaters 1 & 2 must less than 500 MM ft³.

32.d.ii. Total natural gas usage in Burners 1 & 2 must less than 27 MM ft³.

32.d.iii. Total natural gas usage in the RCO must be less than 42 MM ft³.

32.d.iv. Dryers 1 & 2 Total Dried Douglas Fir Production must be less than 210,000 Msf—3/8” finished.

32.d.v. Press 1 LVL production must be less than 7380 M ft³.

32.d.vi. Press 2 LVL production must be less than 4620 M ft³.

32.e. The emission factors for calculating pollutant emissions are as follows:

Emissions Unit	Pollutant	Fuel Type or Device	Emission Factor	Units
Heaters 1 & 2	PM/PM ₁₀	Natural gas	6.0	lb/MM ft ³
	CO	Natural gas	36.7	lb/MM ft ³
	NO _x	Natural gas	30.2	lb/MM ft ³
	VOC	Natural gas	5.5	lb/MM ft ³
Dryers 1 & 2/RCO	PM/PM ₁₀	Douglas Fir/Pine	0.011	b/MSF

*Emission rate

Notes

(a) VOC = VOC as propane + methanol + formaldehyde

32.f. The emission factors listed in Condition 32.e are not enforceable limits unless otherwise specified in this permit.

GENERAL TESTING REQUIREMENTS

33. Unless otherwise specified in this permit, the permittee must conduct all testing in accordance with the Department's Source Sampling Manual. [OAR 340-212-0120]
- 33.a. Unless otherwise specified by a state or federal regulation, the permittee must submit a source test plan to the Department at least 30 days prior to the date of the test. The test plan must be prepared in accordance with the Source Sampling Manual and address any planned variations or alternatives to prescribed test methods. The permittee should be aware that if significant variations are requested, it may require more than 30 days for the Department to grant approval and may require EPA approval in addition to approval by the Department.
- 33.b. Only regular operating staff may adjust the processes or emission control device parameters during a compliance source test and within two (2) hours prior to the tests. Any operating adjustments made during a compliance source test, which are a result of consultation during the tests with source testing personnel, equipment vendors, or consultants, may render the source test invalid.
- 33.c. Unless otherwise specified by permit condition or Department approved source test plan, all compliance source tests must be performed as follows:
- 33.c.i. at least 90% of the design capacity for new or modified equipment;
- 33.c.ii. at least 90% of the maximum operating rate for existing equipment; or
- 33.c.iii. at 90 to 110% of the normal maximum operating rate for existing equipment. For purposes of this permit, the normal maximum operating rate is defined as the 90th percentile of the average hourly operating rates during a 12 month period immediately preceding the source test. Data supporting the normal maximum operating rate must be included with the source test report.
- 33.d. Each source test must consist of at least three (3) test runs and the emissions results must be reported as the arithmetic average of all valid test runs. If for reasons beyond the control of the permittee a test run is invalid, the Department may accept two (2) test runs for demonstrating compliance with the emission limit or standard.

- 33.e. Source test reports prepared in accordance with the Department's Source Sampling Manual must be submitted to the Department within 60 days of completing any required source test, unless a different time period is approved in the source test plan submitted prior to the source test.
34. "Modified EPA Method 9" means the minimum visible emission observation period must be six minutes, though longer periods may be required by a specific rule or permit condition. During the test period, if any one reading is equal to or greater than the visible emissions limit for the emissions unit, then the observation period must be a minimum of 60 minutes or until a violation of the emissions standard has been documented; whichever is a shorter period. Aggregate times (e.g., 3 minutes in any one hour) consist of the total duration of all readings during the observation period that are equal to or exceed the opacity percentage in the standard, whether or not the readings are consecutive. Each EPA Method 9 reading represents 15 seconds of time. [See the definition of "Opacity" in OAR 340-208-0010]

GENERAL MONITORING AND RECORDKEEPING REQUIREMENTS

General Title V Monitoring Requirements

35. The permittee must not knowingly render inaccurate any required monitoring device or method. [OAR 340-218-0050(3)(a)(E)]
36. Methods used to determine actual emissions for fee purposes must also be used for compliance determination and can be no less rigorous than the requirements of OAR 340-218-0080. [OAR 340-218-0050(3)(a)(F)]
37. Monitoring requirements must commence on the date of permit issuance unless otherwise specified in the permit or an applicable requirement. [OAR 340-218-0050(3)(a)(G)]

General Title V Recordkeeping Requirements

38. The permittee must maintain the following general records of testing and monitoring required by this permit: [OAR 340-218-0050(3)(b)(A)]
- 38.a. the date, place as defined in the permit, and time of sampling or measurements;
 - 38.b. the date(s) analyses were performed;
 - 38.c. the company or entity that performed the analyses;
 - 38.d. the analytical techniques or methods used;
 - 38.e. the results of such analyses;
 - 38.f. the operating conditions as existing at the time of sampling or measurement; and
 - 38.g. the records of quality assurance for continuous monitoring systems (including but not limited to quality control activities, audits, calibration drift checks).
39. Unless otherwise specified by permit condition, the permittee must make every effort to maintain 100 percent of the records required by the permit. If information is not obtained or recorded for legitimate reasons (e.g., the monitor or data acquisition system malfunctions due to a power outage), the missing record(s) will not be considered a permit deviation provided the amount of data lost does not exceed 10% of the averaging periods in a reporting period or 10% of the total operating hours in a reporting period, if no averaging time is specified. Upon discovering that a required record is missing, the permittee must document the reason for the missing record. In addition, any missing record that can be recovered from other available information will not be considered a missing record. [OAR 340-214-0110, 340-212-0160, and 340-218-0050(3)(b)]
40. Recordkeeping requirements must commence on the date of permit issuance unless otherwise specified in the permit or an applicable requirement. [OAR 340-218-0050(3)(b)(C)]

41. Unless otherwise specified, the permittee must retain records of all required monitoring data and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit. [OAR 340-218-0050(b)(B)]

REPORTING REQUIREMENTS

General Title V Reporting Requirements

42. Excess Emissions Reporting: The permittee must report all excess emissions in accordance with OAR 340-214-0300 through 340-214-0360. In summary, the permittee must immediately (i.e., as soon as possible but in no case more than one hour after the beginning of the excess emission period) notify the Department by telephone or in person of any excess emission, other than pre-approved startup, shutdown, or scheduled maintenance. Notification must, to the extent reasonably ascertainable at the time of notification, include the source name, nature of the emissions problem, name of the person making the report, name and telephone number of the contact person for further information, date and time of the onset of the upset condition, whether or not the incident was planned, the cause of the excess emission (e.g., startup, shutdown, maintenance, breakdown, or other), equipment involved in the upset, estimated type and quantity of excess emissions, estimated time of return to normal operations, efforts made to minimize emissions, and a description of remedial actions to be taken. Follow-up reporting must be made in accordance with Department direction and OAR 340-214-0330(2) and 340-214-0340.
- 42.a. In the event of any excess emissions which are of a nature that could endanger public health and occur during non-business hours, weekends, or holidays, the permittee must immediately notify the Department by calling the Oregon Emergency Response System (OERS). The current number is 1-800-452-0311.
- 42.b. If startups, shutdowns, or scheduled maintenance may result in excess emissions, the permittee must submit startup, shutdown, or scheduled maintenance procedures used to minimize excess emissions to the Department for prior authorization, as required in OAR 340-214-0310 and 340-214-0320. New or modified procedures must be received by the Department in writing at least 72 hours prior to the first occurrence of the excess emission event. The permittee must abide by the approved procedures and have a copy available at all times.
- 42.c. The permittee must notify the Department of planned startup/shutdown or scheduled maintenance events only if required by permit condition or if the source is located in a nonattainment area for a pollutant which may be emitted in excess of applicable standards.
- 42.d. The permittee must maintain and submit to the Department a log of planned and unplanned excess emissions, on Department approved forms, in accordance with OAR 340-214-0340.
43. Permit Deviation Reporting. The permittee must promptly report deviations from permit requirements that do not cause excess emissions, including those attributable to upset conditions, as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. "Prompt" means within seven (7) days of the deviation. Deviations that cause excess emissions, as specified in OAR 340-214-0300 through 340-214-0360 must be reported in accordance with OAR 340-214-0340. [OAR 340-218-0050(3)I(B)]

Semi-annual and Annual Title V Reports

44. The permittee must submit four (4) copies of reports of any required monitoring at least every 6 months, completed on forms approved by the Department. Six month periods are January 1 to June 30, and July 1

- to December 31. One copy of the report must be submitted to the Air Quality Division, two copies to the regional office, and one copy to the EPA. All instances of deviations from permit requirements must be clearly identified in such reports: [OAR 340-218-0050(3)I(A) and 340-218-0080(6)(d)]
- 44.a. The first semi-annual report must be submitted no later than **August 15** and must include the semi-annual compliance certification (Form R1002 and if applicable R1003). [OAR 340-218-0080].
- 44.b. The annual report must be submitted no later than **March 1** and must consist of the following:
- 44.b.i. The emission fee report (Forms F1101 – F1106, as applicable). [OAR 340-220-0100]
- 44.b.ii. The annual emission inventory report for the prior calendar year (Form R1001). [40 CFR part 51]
- 44.b.iii. A copy of the excess emissions upset log entries. [OAR 340-214-0340]
- 44.b.iv. The second semi-annual compliance certification (Form R1002 and if applicable R1003). [OAR 340-218-0080]
45. The semi-annual compliance certification must include the following (provided that the identification of applicable information may cross-reference the permit or previous reports, as applicable): [OAR 340-218-0080(6)I]
- 45.a. The identification of each term or condition of the permit that is the basis of the certification;
- 45.b. The identification of the method(s) or other means used by the owner or operator for determining the compliance status with each term and condition during the certification period, and whether such methods or other means provide continuous or intermittent data. Such methods and other means must include, at a minimum, the methods and means required under OAR 340-218-0050(3). *Note: Certification of compliance with the monitoring conditions in the permit is sufficient to meet this requirement, except when the permittee must certify compliance with new applicable conditions that are incorporated by reference. When certifying compliance with new applicable conditions that are incorporated by reference, the permittee must provide the information required by this condition.* If necessary, the owner or operator also must identify any other material information that must be included in the certification to comply with section 113I(2) of the FCAA, which prohibits knowingly making a false certification or omitting material information;
- 45.c. The status of compliance with terms and conditions of the permit for the period covered by the certification, based on the method or means designated in Condition 45.b. The certification must identify each deviation and take it into account in the compliance certification. The certification must also identify as possible exceptions to compliance any periods during which compliance is required and in which an excursion or exceedance, as defined under OAR 340-200-0020, occurred; and
- 45.d. Such other facts as the Department may require to determine the compliance status of the source.
- 45.e. Notwithstanding any other provision contained in any applicable requirement, the owner or operator may use monitoring as required under OAR 340-218-0050(3) and incorporated into the permit, in addition to any specified compliance methods, for the purpose of submitting compliance certifications. [OAR 340-218-0080(6)(e)]

Other Title V Reporting Requirements

- 46. All required reports must be certified by a responsible official consistent with OAR 340-218-0040(5). [OAR 340-218-0050(3)I(D)]
- 47. Reporting requirements shall commence on the date of permit issuance unless otherwise specified in the permit. [OAR 340-218-0050(3)I(E)]
- 48. Addresses of regulatory agencies are the following, unless otherwise instructed:

DEQ – Western Region 750 Front Street NE, Suite 120 Salem, OR 97301-1039 (503) 378-8240	DEQ – Air Quality Division 811 SW Sixth Avenue Portland, OR 97204 (503) 229-5359	Air Operating Permits US Environmental Protection Agency Mail Stop OAQ-108 1200 Sixth Avenue Seattle, WA 98101
--	---	--

NON-APPLICABLE REQUIREMENTS

- 49. State and Federal air quality requirements (e.g., rules and regulations) currently determined not applicable to the permittee are listed below along with the reason for the non-applicability: [OAR 340-218-0110]

Applicable Requirement	Reason Code	Applicable Requirement	Reason Code	Applicable Requirement	Reason Code	Applicable Requirement	Reason Code

Reason code definitions:

- a this pollutant is not emitted by the facility
- b the facility is not in this source category
- c the facility is not in a special control/nonattainment area

- d the facility is not in this county
- e the facility does not have this emissions unit
- f the facility does not use this fuel type
- g the rule does not apply because no changes have been made at the facility that would trigger these procedural requirements
- h this method/procedure is not used by the facility
- i this rule applies only to DEQ and regional authorities
- j there are no emissions units with add-on control devices or the pre-controlled potential emissions are less than 100 tons per year or the emissions units with add-on control devices and pre-controlled emissions greater than 100 tons per year are subject to emissions standards promulgated after November of 1990

GENERAL CONDITIONS

G1. General Provision

Terms not otherwise defined in this permit have the meaning assigned to such terms in the referenced regulation.

G2. Reference materials

Where referenced in this permit, the versions of the following materials are effective as of the dates noted unless otherwise specified in this permit:

- a. Source Sampling Manual; January 23, 1992 - State Implementation Plan Volume 3, Appendix A4;
- b. Continuous Monitoring Manual; January 23, 1992 - State Implementation Plan Volume 3, Appendix A6; and
- c. All state and federal regulations as in effect on the date of issuance of this permit.

G3. Compliance [OAR 340-218-0040(3)(n)(C), 340-218-0050(6), and 340-218-0080(4)]

- a. The permittee must comply with all conditions of this permit. Any permit condition noncompliance constitutes a violation of the Federal Clean Air Act and/or state rules and is grounds for enforcement action; for permit termination, revocation and re-issuance, or modification; or for denial of a permit renewal application. Any noncompliance with a permit condition specifically designated as enforceable only by the state constitutes a violation of state rules only and is grounds for enforcement action; for permit termination, revocation and re-issuance, or modification; or for denial of a permit renewal application.
- b. Any schedule of compliance for applicable requirements with which the source is not in compliance at the time of permit issuance is supplemental to, and does not sanction noncompliance with the applicable requirements on which it is based.
- c. For applicable requirements that will become effective during the permit term, the source must meet such requirements on a timely basis unless a more detailed schedule is expressly required by the applicable requirement.

G4. Masking Emissions:

The permittee must not install or use any device or other means designed to mask the emission of an air contaminant that causes or is likely to cause detriment to health, safety, or welfare of any person or otherwise violate any other regulation or requirement. [OAR 340-208-0400] This condition is only enforceable by the state.

G5. Credible Evidence:

Notwithstanding any other provisions contained in any applicable requirement, any credible evidence may be used for the purpose of establishing whether a person has violated or is in violation of any such applicable requirements. [OAR 340-214-0120]

G6. Certification [OAR 340-214-0110, 340-218-0040(5), 340-218-0050(3)(c)(D), and 340-218-0080(2)]

Any document submitted to the Department or EPA pursuant to this permit must contain certification by a responsible official of truth, accuracy and completeness. All certifications must state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and, complete. The permittee must promptly, upon discovery, report to the Department a material error or omission in these records, reports, plans, or other documents.

G7. Open Burning [OAR Chapter 340, Division 264]

The permittee is prohibited from conducting open burning, except as may be allowed by OAR 340-264-0020 through 340-264-0200.

G8. Asbestos [40 CFR Part 61, Subpart M (federally enforceable), OAR Chapter 340-248-0005 through 340-248-0180 (state-only enforceable) and 340-248-0205 through 340-248-0280]

The permittee must comply with OAR Chapter 340, Division 248, and 40 CFR Part 61, Subpart M when conducting any renovation or demolition activities at the facility.

G9. Stratospheric Ozone and Climate Protection [40 CFR 82 Subpart F, OAR 340-260-0040]

The permittee must comply with the standards for recycling and emissions reduction pursuant to 40 CFR Part 82, Subpart F, Recycling and Emissions Reduction.

G10. Permit Shield [OAR 340-218-0110]

- a. Compliance with the conditions of the permit is deemed compliance with any applicable requirements as of the date of permit issuance provided that:
 - i. such applicable requirements are included and are specifically identified in the permit, or
 - ii. the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the source, and the permit includes the determination or a concise summary thereof.
- b. Nothing in this rule or in any federal operating permit alters or affects the following:
 - i. the provisions of ORS 468.115 (enforcement in cases of emergency) and ORS 468.035 (function of department);
 - ii. the liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
 - iii. the applicable requirements of the national acid rain program, consistent with section 408(a) of the FCAA; or
 - iv. the ability of the Department to obtain information from a source pursuant to ORS 468.095 (investigatory authority, entry on premises, status of records).
- c. Sources are not shielded from applicable requirements that are enacted during the permit term, unless such applicable requirements are incorporated into the permit by administrative

amendment, as provided in OAR 340-218-0150(1)(h), significant permit modification, or reopening for cause by the Department.

G11. Inspection and Entry [OAR 340-218-0080(3)]

Upon presentation of credentials and other documents as may be required by law, the permittee must allow the Department of Environmental Quality, or an authorized representative (including an authorized contractor acting as a representative of the EPA Administrator), to perform the following:

- a. enter upon the permittee's premises where an Oregon Title V Operating Permit program source is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
- b. have access to and copy, at reasonable times, any records that must be kept under conditions of the permit;
- c. inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
- d. as authorized by the FCAA or state rules, sample or monitor, at reasonable times, substances or parameters, for the purposes of assuring compliance with the permit or applicable requirements.

G12. Fee Payment [OAR 340-220-0010, and 340-220-0030 through 340-220-0190]

The permittee must pay an annual base fee and an annual emission fee for all regulated air pollutants except for carbon monoxide, any class I or class II substance subject to a standard promulgated under or established by Title VI of the Federal Clean Air Act, or any pollutant that is a regulated air pollutant solely because it is subject to a standard or regulation under section 112(r) of the Federal Clean Air Act. The permittee must submit payment to the Department of Environmental Quality, Business Office, 811 SW 6th Avenue, Portland, OR 97204, within 30 days of the date the Department mails the fee invoice or August 1 of the year following the calendar year for which emission fees are paid, whichever is later. Disputes must be submitted in writing to the Department of Environmental Quality. Payment must be made regardless of the dispute. User-based fees will be charged for specific activities (e.g., computer modeling review, ambient monitoring review, etc.) requested by the permittee.

G13. Off-Permit Changes to the Source [OAR 340-218-0140(2)]

- a. The permittee must monitor for, and record, any off-permit change to the source that:
 - i. is not addressed or prohibited by the permit;
 - ii. is not a Title I modification;
 - iii. is not subject to any requirements under Title IV of the FCAA;
 - iv. meets all applicable requirements;
 - v. does not violate any existing permit term or condition; and
 - vi. may result in emissions of regulated air pollutants subject to an applicable requirement but not otherwise regulated under this permit or may result in insignificant changes as defined in OAR 340-200-0020.
- b. A contemporaneous notification, if required under OAR 340-218-0140(2)(b), must be submitted to the Department and the EPA.
- c. The permittee must keep a record describing off-permit changes made at the facility that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those off-permit changes.
- d. The permit shield of Condition G10 does not extend to off-permit changes.

G14. Section 502(b)(10) Changes to the Source [OAR 340-218-0140(3)]

- a. The permittee must monitor for, and record, any section 502(b)(10) change to the source, which is defined as a change that would contravene an express permit term but would not:
 - i. violate an applicable requirement;
 - ii. contravene a federally enforceable permit term or condition that is a monitoring, recordkeeping, reporting, or compliance certification requirement; or
 - iii. be a Title I modification.
- b. A minimum 7-day advance notification must be submitted to the Department and the EPA in accordance with OAR 340-218-0140(3)(b).
- c. The permit shield of Condition G10 does not extend to section 502(b)(10) changes.

G15. Administrative Amendment [OAR 340-218-0150]

Administrative amendments to this permit must be requested and granted in accordance with OAR 340-218-0150. The permittee must promptly submit an application for the following types of administrative amendments upon becoming aware of the need for one, but no later than 60 days of such event:

- a. legal change of the registered name of the company with the Corporations Division of the State of Oregon, or
- b. sale or exchange of the activity or facility.

G16. Minor Permit Modification [OAR 340-218-0170]

The permittee must submit an application for a minor permit modification in accordance with OAR 340-218-0170.

G17. Significant Permit Modification [OAR 340-218-0180]

The permittee must submit an application for a significant permit modification in accordance with OAR 340-218-0180.

G18. Staying Permit Conditions [OAR 340-218-0050(6)(c)]

Notwithstanding Conditions G16 and G17, the filing of a request by the permittee for a permit modification, revocation and re-issuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

G19. Construction/Operation Modification [OAR 340-218-0190]

The permittee must obtain approval from the Department prior to construction or modification of any stationary source or air pollution control equipment in accordance with OAR 340-210-0200 through OAR 340-210-0250.

G20. New Source Review Modification [OAR 340-224-0010]

The permittee may not begin construction of a major source or a major modification of any stationary source without having received an air contaminant discharge permit (ACDP) from the Department and having satisfied the requirements of OAR 340, Division 224.

G21. Need to Halt or Reduce Activity Not a Defense [OAR 340-218-0050(6)(b)]

The need to halt or reduce activity will not be a defense. It will not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

G22. Duty to Provide Information [OAR 340-218-0050(6)(e) and OAR 340-214-0110]

The permittee must furnish to the Department, within a reasonable time, any information that the Department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon request, the permittee must also furnish to the Department copies of records required to be retained by the permit or, for information claimed to be confidential, the permittee may furnish such records to the Department along with a claim of confidentiality.

G23. Reopening for Cause [OAR 340-218-0050(6)(c) and 340-218-0200]

- a. The permit may be modified, revoked, reopened and reissued, or terminated for cause as determined by the Department.
- b. A permit must be reopened and revised under any of the circumstances listed in OAR 340-218-0200(1)(a).
- c. Proceedings to reopen and reissue a permit must follow the same procedures as apply to initial permit issuance and affect only those parts of the permit for which cause to reopen exists.

G24. Severability Clause [OAR 340-218-0050(5)]

Upon any administrative or judicial challenge, all the emission limits, specific and general conditions, monitoring, recordkeeping, and reporting requirements of this permit, except those being challenged, remain valid and must be complied with.

G25. Permit Renewal and Expiration [OAR 340-218-0040(1)(a)(D) and 340-218-0130]

- a. This permit expires at the end of its term, unless a timely and complete renewal application is submitted as described below. Permit expiration terminates the permittee's right to operate.
- b. Applications for renewal must be submitted at least 12 months before the expiration of this permit, unless the Department requests an earlier submittal. If more than 12 months is required to process a permit renewal application, the Department must provide no less than six (6) months for the owner or operator to prepare an application.
- c. Provided the permittee submits a timely and complete renewal application, this permit will remain in effect until final action has been taken on the renewal application to issue or deny the permit.

G26. Permit Transference [OAR 340-218-0150(1)(d)]

The permit is not transferable to any person except as provided in OAR 340-218-0150(1)(d).

G27. Property Rights [OAR 340-200-0020 and 340-218-0050(6)(d)]

The permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations, except as provided in OAR 340-218-0110.

G28. Permit Availability [OAR 340-200-0020 and 340-218-0120(2)]

The permittee must have available at the facility at all times a copy of the Oregon Title V Operating Permit and must provide a copy of the permit to the Department or an authorized representative upon request.
